

As a resident of New Jersey, I am very pleased with this state's handling of the "do not call" enactment, and it is beyond my understanding that the Federal Government would want to restrict it in any way. I am guessing that some lobbying group is behind the scenes, as is often the case. In any event, it is working out very well for me and for my family, friends, and neighbors. Some calls still come through, for example, charities and non-profit organizations. This is fine and the way it should be. Why would you want to tamper with this!?! I hope you will desist.
